

Dr. Amy Acton signed an order this week requiring providers to notify residents, families, and staff members within 24 hours after a resident or staff member is confirmed positive or probable for COVID-19 and to send a copy of the notice to ODH. A probable case is a person who has not been tested but has symptoms and no other explanation for them. ODH has now posted this list, which includes SNFs, residential care facilities (RCFs), and residential facilities licensed by the Department of Developmental Disabilities (DODD).
