

Members and consumers regularly contact us to point out that continued visitation restrictions in SNFs, while assisted living communities and ICFs/IID are re-opening, have a deleterious effect on patients' health. Nonetheless, the Director of Health's visitation order remains in full effect for SNFs. OHCA is having conversations with Director of Aging Ursel McElroy and other interested parties about re-opening SNFs, but at this time, no date or process for that has been established.
